CAUTION: This unit contains a high voltage capacitor which can store a charge of up to 3000 volts for up to 10 minutes after power is removed. Do not touch the capacitor or any other internal components until the capacitor has been fully discharged. The capacitor is located in the back of the unit. To discharge the capacitor, remove the cover of the capacitor and touch the metal cover to the metal chassis of the unit. Do not touch the capacitor or any other internal components until the capacitor has been fully discharged. The capacitor is located in the back of the unit. To discharge the capacitor, remove the cover of the capacitor and touch the metal cover to the metal chassis of the unit.

ADANGER

vehicles and equipment powered by internal combustion engines and placed in non-ventilated vehicles may create carbon monoxide poisoning or asphyxiation, which could result in death or serious injury.

The flammable liquids used to power these items can create a fire or explosion, which can result in death or serious injury.

- To reduce risk:
1. Do not ride in the vehicle storage area when vehicles are present.
 2. Do not sleep in the vehicle storage area when vehicles are present.
 3. Close doors and windows to area of operation if unattended when any vehicle is present.
 4. Run fuel out of engines of stored vehicles after shutting off fuel at the tank.
 5. Do not smoke, inhale, or breathe fuel fumes in the vehicle.
 6. Open the windows, openings, or air circulation system provided for causing the transportation area when vehicles are present.
 7. Do not operate propane appliances, pilot lights, or electrical equipment when mentioned vehicles are present.

⚠ DANGER

Vehicles and equipment powered by internal combustion engines and placed in restricted application, which could result in death or serious injury.

The flammable liquids used to power these items can cause a fire or explosion, which can result in death or serious injury.

To reduce risk:

1. Do not ride in the vehicle storage area when vehicles are present.
2. Do not sleep in the vehicle storage area when vehicles are present.
3. Close doors and windows in wake of separation (if installed) when any vehicle is present.
4. Run fuel out of engines of stored vehicles after shutting off fuel at the tank.
5. Do not store, transport, or dispense fuel inside this vehicle.
6. Open the windows, openings, or air ventilation systems provided for venting the transportation area when vehicles are present.
7. Do not operate propane appliances, pilot lights, or electrical equipment when motorized vehicles are present.

Vehicles and combustion engines may cause fire or explosion, which can result in death or serious injury. To reduce the risk of fire or explosion, do not use flammable liquids or gases in the vehicle storage area. Do not use open flames or smoking materials in the vehicle storage area. Do not use electrical equipment in the vehicle storage area. Do not use electrical equipment in the vehicle storage area.
